I am currently trying to determine whether or not an tag exists at a specific moment in time. I am storing the value of a tag's attribute as a binary in a string. I have the following code select @a = 'man'; select @a_end = CHARINDEX('>', @a); select @a_tag = @a_end-1; select @a_tag_text = @a_tag; select @a_tag_binary = right(@a_tag_text,1); I am then looking for the '>' in the middle of the string. This works fine until for example, the variable @a ends with the text '>hello'; Now @a_end is 3. How can I tell whether or not the search will be successful in that scenario? A: Your logic is flawed. Try this: declare @a varchar(100) set @a = 'man' select @a_end = CHARINDEX('>', @a) select @a_tag = case when @a_end = 0 then left(@a, @a_end - 1) else @a_end - 1 end .ll jmp .* ; .code ENDSETUP EXECUTAB
