You can find many other software, games, and applications.Q: How to make tabBar appear first in view pager? I have a view pager that shows me 5 products of different categories. Each product has a text and 3 tabs. In tab 2 and 3 I have the product information. When I press the tabs I see the view, but the tabs appear after the product. How

can I make the tabBar appears first in the viewPager? Here is the code: public ViewPager viewPager; @Override protected void onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); viewPager = (ViewPager) findViewById(R.id.pager); //viewPager.setOffscreenPageLimit(1); //TabsPagerAdapter mPagerAdapter = new TabsPagerAdapter(getSupportFragmentManager()); viewPager.setOffscreenPageLimit(2); viewPager.setAdapter(new

MyPagerAdapter(getSupportFragmentManager())); viewPager.addOnPageChangeListener(new ViewPager.OnPageChangeListener() { @Override public void onPageSelected(int position) { // When swiping between different app views, select the tab that was // previously selected. // TabManager.get 3ef4e8ef8d
