X.[Clinical evaluation of cefpirome in otorhinolaryngological infections]. Cefpirome (CPR), a new cephem antibiotic, was evaluated in otorhinolaryngological infections. Thirty-two patients with otorhinolaryngological infections were treated with CPR (1.5 g by intravenous injection, drip infusion of 100 mg/kg/hr, total dose of 8 to 16 g/day). Clinical results were excellent in 7, good in 11, fair in 9 and poor in 4. Superinfections were observed in 4 cases. Superinfection was eradicated by the cessation of CPR and its repetition. The eradication rate was 93.7%. No side effects were observed in any of the patients. The above results suggest that CPR is a very useful antibiotic for otorhinolaryngological infections.Q: "if(isset(\$\_POST[n]) )", the problem is i do not want to run my command if empty I wrote this code, but if i leave the form empty then i do not want to run my command and i do not want it to do something 2d92ce491b
