Grayd00r Check Usb Connection . Grayd00r Check Usb Connection . Grayd00r Check Usb Connection . Grayd00r Check Usb Connection .Q: PHP DocumentFilter does not work i have a problem filtering a string: $doc = new DOMDocument(); $doc->load("file.xml"); $doc->DocumentFilter = new DocumentFilter(); $xpath = new DOMXPath($doc); $list = $xpath->query('//listElement'); var_dump(array($list)); $list1 = new DOMDocument(); $list1->load("file1.xml"); $list1->DocumentFilter = new DocumentFilter(); $xpath = new DOMXPath($list1); $list2 = $xpath->query('//listElement'); var_dump(array($list2)); The output of the last var_dump-Statement shows the two listItems and the other two DocumentFilter-Statements seem to work fine. Is it only possible to filter one document? When i try to load a second XML-Document the DocumentFilter for this document also seems not to work. php version 5.3.3 A: This example works for me: $doc = new DOMDocument(); $doc->load("file.xml"); $doc->DocumentFilter = new DocumentFilter(); $doc->DocumentFilter->encoding = 'utf-8'; $xpath = new DOMXPath($doc); $list = $xpath->query('//listElement'); $list1 = new DOMDocument(); $list1->load("file1.xml"); $list1->DocumentFilter = new DocumentFilter(); $list2 = $xpath->query('//listElement'); var_dump($list1);
