I want to access the @PersistenceContext properties directly. I can access it via Spring context.getBean(Customer.class) It is possible to access @PersistenceContext directly? A: You don't need to do this, although it's possible. Class.forName(connection.getDriverClassName()).newInstance(); Connection connection = DriverManager.getConnection(connection.getUrl(), connection.getUser(), connection.getPassword()); Type type = new TypeReference() {}; EntityManager entityManager = context.getBean(type); //You can use entityManager.find(...) or //entityManager.createQuery(...) here Q: Plotting similar triangles in Python I have a list of numbers where each number represents a different way of comparing two polygons. The number is the difference in area of the triangles (for example: 0 means the triangles are the same area). This is how the values are set in the list: Delta = [2.47, 0.09, 0.08, 0.06, 1.16, 3.62, 2.29, 0.17, 0.07, 0.05, 0.03, 0.01, 0.06, 0.03, 0.03, 0.03, 0.02, 0.02, 0.01, 0.02, 0.02, 0.02, 0.02, 0.02, 0.03, 0.04, 0.03, 0.04, 0.04, 0.04, 0.04, 0.05, 0.04, 0.04, 0.05, 0.05, 0.06, 0.05, 0.06, 0.06, 0.07, 0.07, 0.07, 0.07, 0. f3e1b3768c
