Alien Earth fully cracked version [Hacked] 02-Dec-2022 Mechs V Kaijus | In this tower defense game, you will take control of a group of 2 mechs that must defend a human settlement from deadly monsters and robots. You will have to direct your mechs to launch missiles, lasers, and other weapons to take down the enemies, which include monsters, war machines and robots. If you get destroyed, you can not choose your next target and you get a game over, but you can still make use of your remaining mechs. You can build towers to defend your base from different angles and locations, and deploy the mechs to take out the enemies. This is a complete game with 6 maps, 100 levels, and endless gameplay.
