Coub is YouTube for video loops. You can take any video, trim the best part, merge with other videos, add soundtrack. This could be a funny scene. Today, this is not just a set of videos, it is a whole repository that has everything you might need to learn a language, from video and audio lessons to texts, exercises, games, and so on. In it you can find everything that will help you learn English, as well as help improve its memorization. It really is a great way to learn a language without spending a dime.
