Edit: Looking at the Dockerfile on the official Dockerfile Hub page it is actually 64bit.The current status of the game of golf is that it is a simple game. The fundamental elements of the game are the same as those used in any other game—a ball, a tee, a putting cup. Variations of a basic game are often found in accordance with the sizes of the courses, the degree of difficulty of the hole layouts, and perhaps the amount of time required by the average golfer to complete the course. The game as defined by current rules, however, is perhaps too uncomplicated for many who play the game. Because of the simplicity of the game, many who play the game fail to maintain their skills by practicing the game. Further, the current rules limit the variety of shots that can be used to obtain the maximum possible score. Also the scores typically awarded in the game are too low for many players. In order to advance the game of golf, an alternative to the current rules that would increase the number of different shots which can be used to score and the strength of the individual shots must be devised. An alternative to the current teeing devices must also be devised to allow a player to make a more precise teeing. Such alternative methods and devices will expand the pool of golfers who play the game. Finally, the development of more effective training aids will expand the playing abilities of the current members of the game of golf.The former leader of Egypt's Muslim
