Q: .NET SQL Server LINQ to Entities provider fails with SqlDateTime overflow I am using a LINQ to Entities provider to extract some information from a SQL Server database. In one case I get an SqlException with the following message: "A severe failure occurred on the server. The results, if any, should be discarded. See previous errors for details. System.Data.SqlTypes.SqlDateTime overflow. Must be between 1/1/1753 12:00:00 AM and 12/31/9999 11:59:59 PM." I know this error is the familiar but I am not sure what causes it. I am using .NET 3.5 SP1, LINQ2SQL, .NET 4.0, Sql Server 2005 and Visual Studio 2008. A: If you're storing date/times in a database, don't store them as text. At some point, they'll be implicitly converted to a datetime anyway (usually at the display stage), and if you don't specify "SQL Server datetime format", the default will be yyyy/mm/dd hh:mm:ss. Use the saved file I will update this guide to show you more. Please send me a screenshot of the issue you have and I will do my best to update the guide. Hi, I just want to ask if someone can guide me how to install these. I can't find the option to create my own license. I am trying to access the autocad 2019 serial numbers. I tried the keygen, it generated the numbers but I cant open autocad because the serial number is different. Hello, I got your link and downloaded the Autodesk Plugin, but I can't use it, the license key is wrong. I tried a lot of things, changing the software license as u say, changing the serial number, change the installer name, but nothing works. The problem is in the license key. That is a known issue. I tried to download the autocad license key from Autodesk website but it is no longer available for download. Autodesk is not willing to share this information. Hello, Thank you for the guide. I downloaded the plugin but I can't open Autocad. I had to activate the software to install the plugin, but I can't find a license file inside the autocad. I just found the serial number and the end product. I tried downloading the License key from autodesk and when I click save I receive the following error “The specified file does not exist. You may need to contact your administrator”. When I click contact administrator it just says
