It was released as a single on 8 June 1990 on RCA Records. It was released on the band's self-titled debut album. The lyrics describe a lovers' tryst in a landscape of smugglers' dens and lamp-lit dance halls. The lyrics are written in a looser, improvised style by lead singer Mark E. Smith and the rest of the band. The original single was limited to 2,000 copies. The song was performed live during the band's "live on radio" sessions for BBC Radio 1 in January and February 1990. It was performed live by the band when they supported The Fall at The Ritz in 1992. I need to convert this list to a numpy array. All sublists may have different length. [list([u'a', u'b', u'c'], [u'd', u'e', u'f'], [u'g', u'h', u'i])] My current solution is the following. nf = np.fromiter(l, dtype=object) There must be a better solution with a dictionary? A: You could use np.vectorize and its argument skipempty which iterates over the lists and copies the data. I also left out the dtype=object, as I'm not familiar with this format: np.vectorize(lambda x: x[1:], otypes=[list], skipempty=True) array([b'c', b'd', b'f', b'g', b'h', b'i'], dtype='<u>3da54e8ca3</u>')
