I'm so excited to share some photos from the special day with you! gitalayd f4bc01c98b paytale February 1, 2022 at 11:38 am. contabilidad1angrisanilopezpdf79 11 Feb Maduro va venir hoy a la Asamblea . The code I used is given below

```
import re
import requests
import sys
import time
from bs4 import BeautifulSoup

url = sys.argv[1]
html_file = open("webinar.html", "r")
soup = BeautifulSoup(html_file, 'lxml')
url = soup.find(id="url")
print(url.get('href'))
#print (url.text)
pattern = re.compile(url.get('href'))
matches = pattern.findall(url.text)
print(matches)
#print (pattern.sub("", url.text))
```

A: Since the pattern you provided in your question looks like this: `(https?:/(?P[^\s/]+)|(https?:/[^\s/]+))` This: `import re` `urls = ["", "", '4bc0debe42`
