Requirements: · .NET Framework 2.0 GFrontEnd for MEncoder Description: GFrontEnd for MEncoder is a frontend (GUI) for the MEncoder video converter, which is a free

command line video decoding, encoding and filtering tool. MEncoder is part of the MPlayer project and is licenced under the GNU General Public License. GFrontEnd for MPlayer is reliable and welldone, not to mention

Minimum specs recommended are a fast CPU, 8GB of RAM (or more), and a GPU capable of 1080p with VSync (Morrowind). You should also be able to easily fill up the hard drive before hitting any graphics issues. The minimum recommended systems are a 486 with 2 GB of RAM, 4 GB of VRAM, and a GeForce 3 or better (could be a Radeon HD 2600/2600 XT). EDIT: Reduced the size of the download by 1.5GB and added a readme.txt to the bottom of the
