If yes is it possible to implement it with a series connection of an AND gate and a NOT gate? I think it is possible but I'm not sure. A: Whether you need an AND gate as the preceding stage or not depends on what you want to achieve. For a simple NAND gate, where you only want to output a HIGH if both the previous and following stages are HIGH, you don't need the preceding stage. So you can substitute an AND gate with an INVERTER and save one inverter. For a simple NOR gate, where you want to output a HIGH if either of the previous or following stages is HIGH and another LOW, you don't need the preceding stage. So you can substitute an AND gate with a OR gate and save two AND gates. 'use strict'; const errors = require('@tryghost/errors'); const createErrorFromString = require('@tryghost/utils').createErrorFromString; /** * `TryGhostClient` class is used for creating gremlin client that * exposes `TinkerPop|graph-py`/`gremlin-python` APIs with the 'tryghost' * provider. */ class TryGhostClient { constructor(url, connectionConfig) { if (typeof url!=='string' ||!url.trim()) {

I couldn't help but get to know the gorgeous Mina better. She is truly the precious gift of heaven for our family. She has taken our love to a whole new level. Two months ago, when we brought her home after almost two years, we were anxious and excited to show her off to all our dear friends and family who had already shown their love and support for our family. We brought her to a family event in Apeldoorn where we first set eyes on her sweet face. Little did we know that we had made another family member and two of us had to leave the family day early because we simply could not miss the opportunity to spend time with her and to share the love we feel with her. Following our day in Apeldoorn, we have not been allowed to see her. Johan and I went back to Apeldoorn last week to visit our in-laws and friends, but we were denied access to her. At first, we couldn't understand why and speculated that she had not been feeling well. After several conversations with her care-providers, we discovered that she could not be moved because of her IV set. Over the past two weeks, we have been fighting a battle for access to our little angel. Both myself and Johan have done our own research into adoption, and each day we have come across new tools and resources to help us learn more about our little girl. To date, we have visited the NICU in Kenner several times and been denied access to our daughter. I have been referred to the Child Protection Services, however, they have been unable to do anything, as no illegal or child protective services were involved. Although we have been denied access 570a42141b
