DocMerge is a utility for merging multiple documents in a single file. It's designed to be a faster and easier alternative to document concatenation and merging tools that have traditionally been used to merge multiple documents.DocMerge features a unique file queue where each document (optionally) has an optional text page break, and a graphical toolbar that allows users to easily drag-and-drop documents from the queue into the merge document window. Users can also select multiple documents and/or text pages by pressing the Tab key to move between documents in the queue.Document Merging Speed, Navigation and Page Breaks.DocMerge has a speed and navigation option that makes it possible to merge thousands of documents without actually running out of disk space. DocMerge's speed is unmatched and documents can be merged very quickly, so long as they are kept separate as they are created. The length of the merge document is automatically adjusted to the number of documents merged. Users can break a text page in the merge document at any point in the process with the click of a button. They can then drag-and-drop the page break on a new page in the document and merge the remainder of the documents onto the new page. Instead of creating a new page in the merge document, they can add pages directly to the end of the document.DOC and DOCX Documents Supported.DocMerge has the following features:* Multiple Document Merge* Text Page Breaks (optional)* Collate to the Same Page (optional)* Drag and Drop Document support* Add to Queue option* Ability to Split/Merge without Removing Original Documents* Add Page(s) (optional)* Merge Multiple Documents* Menu Bar* Command-Line Interface* Image viewer* Printing* AutoSave* Display Display Info* Quick Search* HTML Document Support* Easy-to-Use* Multiple Languages and Country Options Portable Document Editor (PDE) is a freeware document management utility that has been designed for easy and quick conversion of document formats. Useful information about Doc Merge Portable Doc Merge Portable is a very fast application that can merge two or more documents with no fuss. Only a few seconds are needed to figure out the purpose of each tool, but Doc Merge already provides helpful information in every single window. The whole application comes down to the file selection process because users are required to input the documents they wish to merge from the get go. DOC, DOCX, DOT and DOTX formats are supported, with two different file selection modes: drag and drop support or the "Add Doc" button in the main window. The way documents are arranged in the file queue also represents the order the text shall appear in the output document, so dedicated buttons to move a selected item up or down are also available. One very handy option allows users to use a page break to separate text content, which is strongly recommended especially when working with multiple documents. Doc Merge performs the whole process in just a few seconds, but the overall time needed to complete the task also depends on the size of each document. The app works flawlessly on all Windows versions and uses only a moderate amount of hardware resources in the process. All things considered, Doc Merge does its job
