PCSleek Error Cleaner Free Download Full Version For Windows hereQ: Getting published changeset info from a specific team project in TFS2013 I am working on a continuation of a project with another team member who is working in a different branch of TFS. Because I don't want to get out of the flow of my work I would like to look at his changes that were added to the project. I would like to compare our branch with his branch. So I want to be able to get all the information about a specific changeset. I created a powershell script with the following code and it almost gets what I want. \$changeset = @{
