The quality setting is 19, means the first number is the possible bitrate for a 720p encode at quality setting 19. Make sure that you're familiar with WUSP, it's often a good idea to use the detailed info button. I have a feeling that you'll hit the point where it says 'Cannot determine the size and/or quality setting' though. If you are already enjoying WUSP with your 3rd party Capture card here's two way to make it look better. That is the only thing I can think of that might give you this problem.
