\* Workstations Workstations are computers that deal specifically with graphic arts. Workstation computers enable you to process, store, and transfer graphic arts files. \* Graphics tablet A graphics tablet displays and records pen information that you enter onto a screen. Most use a pressure-sensitive surface. Some are pressure sensitive only when you write, others can be used for other tasks like artwork creation as well. \* Laser printer This desktop model allows you to directly output images from your computer onto paper and other surfaces. Laser printers can provide hard copy output via printing, or they can provide color scanning output via a color copier. They are very important to graphic arts professionals, but color laser printers can be useful for home users, too. \* Scanner A scanner captures images onto disc or directly onto your computer in a usable format. Some scanners are very expensive. They are important tools for graphic arts professionals to have in order to print reproductions of paper originals. However, home users can often substitute a scanner, and professional scanners cost thousands of dollars. Some scanners are optical scanners that take an image through optical components and produce a digital scan of the image. \* Printer A printer provides hard copy output from a computer or scanner. You may find that a multifunction printer with all these features on one small machine is the best choice. Multifunction printers are devices that do more than one function and are available in desktop, mobile, and multifunction models. While they can be very convenient, they can be very expensive. In addition to these basic tools, graphic arts professionals use many additional tools that are fairly expensive. \* Optical lens The optical lens converts light into an image that can be captured by a camera. Modern digital cameras use lenses, but many older cameras use film with a flat glass plate that captures the image. A polarizing filter is usually used on top of the plate to gather more light in the colors of the spectrum that are
